 Komodo
 BEST 4X4 ADVENTURE TIRE

TIRE PROFILE & CONSTRUCTION

- **Komodo claws and skin pattern**
 Enhance aggressive looking and increase traction on soft deep mud

- **Sidewall stopper**
 Increase traction by having longer footprint during low air pressure operation

- **Specially formulated tread Compound**
 Highly resistant to cut and chip, resulting in superior Performance on the rugged terrain

- **1 or 2 nylon breakers**
 Increase protection against road impact and cut resistance.

- **4 layers Nylon carcass plies**
 Reinforce the tire construction and durability

- **Rim Protector Line**
 Protects rim flange against off road hazard and prevent tire bead used during low air pressure operation
